

Cycling and Walking

Proposals

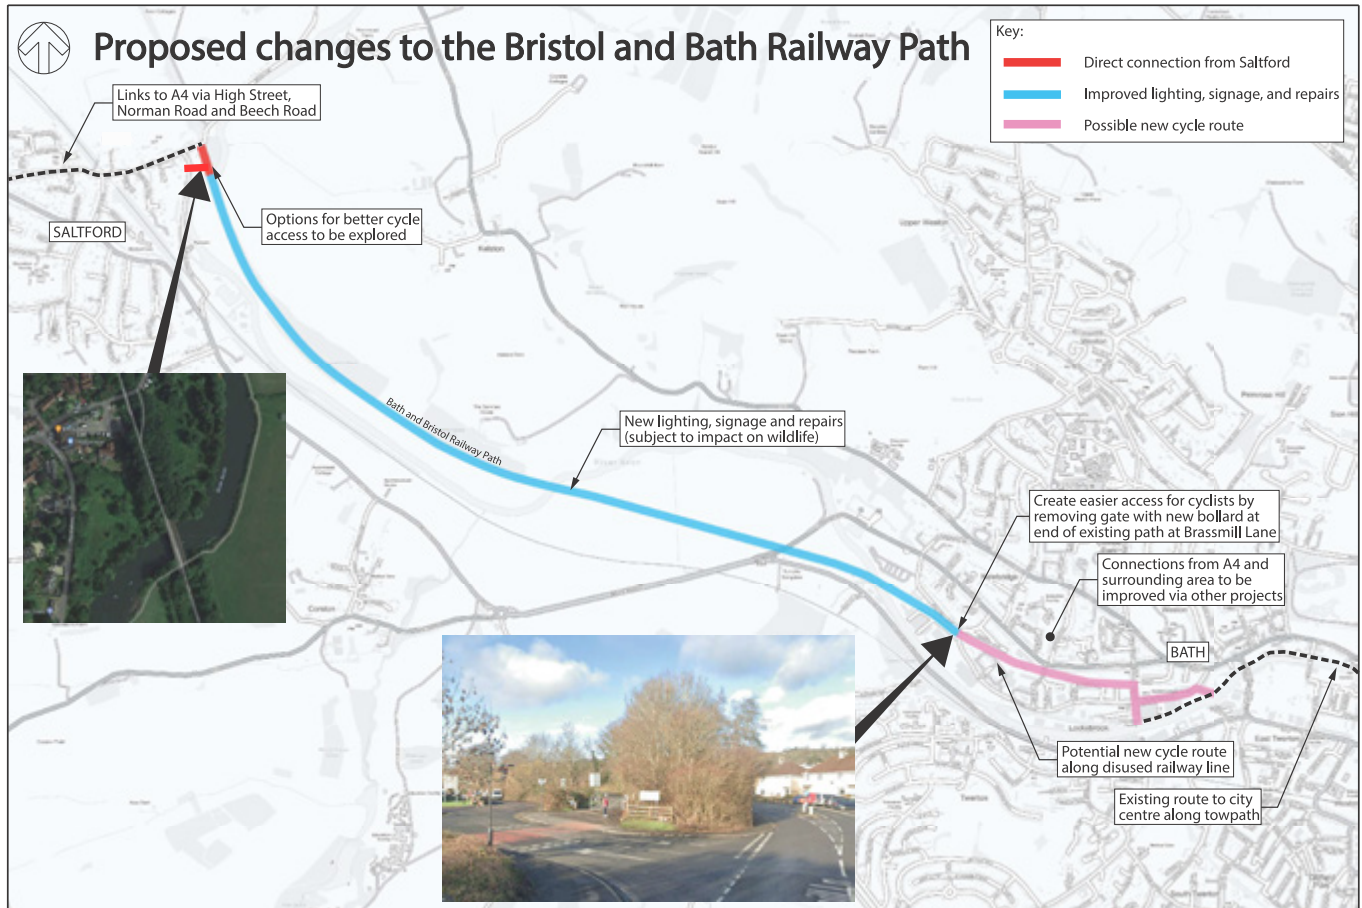

We are looking at a number of improvements that could be made including:

1. Improved access, for example at Salford, by making the connecting roads safer for cyclists with better signage and traffic calming. An alternative to the steep ramp at Salford is also being explored.

2. Widen the path at current pinch points

3. New lighting, introduced sensitively to minimise any impact on wildlife

4. Possibly extend the cycle route in Bath so that it continues off road using a disused railway path between Brassmill Lane and Station Road. Alternative options could be to use part of the Railway Path in combination with quieter local roads, or to re-join the existing riverside path at Station Road.

What could this mean?

- Safer, easier for those cycling as well as walking and wheeling
- Faster journeys by bike between local destinations e.g., Salford to Keynsham, as well as on longer journeys between Bath and Bristol
